Stone Creek Water Conservation Group

UPCOMING SEMINAR

The Role of Florida's Water Resources in Our Community

Tuesday, April 23 at 1 PM in Rooms 1 and 2

In the Reunion Center

Presented by Maxine Hunter, UF/IFAS Extension Marion County

Florida has many water resources that impact recreational activities and communities alike. These include our beautiful rivers and springs to the stormwater ponds in our backyards. This seminar will discuss the history of Florida water, how newer water systems within communities can have impacts on our lives, and best management practices for living near the water.

Pavilion Area Demonstration Garden Gets a Facelift

Stop by the pavilion area to see the new Florida Friendly Landscape Demo Garden installed this week. Amanda Marek, UF/IFAS landscape extension agent, worked with our community manager Rachel Mayer to have the area redone. Florida Friendly means using plants that promote low maintenance, diverse, attractive landscapes that conserve water, protect water quality and provide habitat for wildlife. These are plants that survive and thrive in Florida. Signs will be placed to identify the plants.

Use Our Google Drive
